

# Hardware Component Quick Reference

LIGHTS			
Name and Image	What does it do?	Plug it in	Icon
 <p>LED</p>	It is a single color light source with controllable brightness.	Color → <b>+</b> (Positive) Black → <b>-</b> (Ground) The colored wire of the LED indicates the color of its light!	
 <p>Tri-Color LED</p>	It is a red-green-blue (RGB) light source which can produce many light-based colors.	Red → <b>R</b> (Red) Green → <b>G</b> (Green) Blue → <b>B</b> (Blue) Black → <b>-</b> (Ground)	

MOTORS			
Name and Image	What does it do?	Plug it in	Icon
 <p>Servo</p>	It is a limited range motor with controls for specific angular positions.	Yellow → <b>S</b> (Signal) Red → <b>+</b> (Positive) Black → <b>-</b> (Ground)	
 <p>Motor</p>	It is an electric motor with speed control that can rotate in either direction indefinitely.	Yellow → <b>+</b> (Positive) and <b>-</b> (Ground) Since both wires are the same color, the motor can be plugged in two ways. Switching them just changes which direction is "forward".	
 <p>Vibration Motor</p>	It is a small motor that causes a shaking motion where you can control the intensity of shaking.	Yellow → <b>+</b> (Positive) and <b>-</b> (Ground) Since both wires are the same color, the vibration motor can be plugged in two ways. Switching them just changes which direction the weight spins.	

# SENSORS

Name and Image	What does it do?	Plug it in	Icon
 <p>Distance Sensor</p>	<p>It is a sensor that detects how far away something is.</p>	<p style="text-align: center;">All sensors are connected to the Hummingbird in the same way and can be used on any sensor port:</p> <p style="text-align: center;">Yellow → <b>S</b> Signal</p> <p style="text-align: center;">Red → <b>+</b> Positive</p> <p style="text-align: center;">Black → <b>-</b> Ground</p>	
 <p>Light Sensor</p>	<p>It is a sensor that detects how bright the ambient light is.</p>		
 <p>Temperature Sensor</p>	<p>It is a sensor that detects the temperature.</p>		
 <p>Potentiometer</p>	<p>It is a sensor that detects how it has been rotated.</p>		
 <p>Sound Sensor</p>	<p>It is a sensor that detects how noisy its surroundings are.</p>
